Trelleborg Tires launches new CR3000 and PneuTrac® Aqua at EIMA 2026

- **CR3000 is Trelleborg Tires' new harvesting solution for high-power combines, engineered to resist crop residue damage while delivering superior traction, durability and productivity in demanding harvesting conditions**
- **PneuTrac® Aqua is Trelleborg Tires' latest innovation for center pivot irrigation systems, combining puncture-proof technology, stability and maintenance-free operation for uninterrupted irrigation performance throughout the season**

At EIMA International 2026 in Bologna, Italy, Trelleborg Tires introduces CR3000 and PneuTrac® Aqua, two new tire solutions designed to address some of the most demanding agricultural applications, from harvesting to irrigation.

Presented during a dedicated conference at Hall 14, Stand B2, the new CR3000 and PneuTrac® Aqua further expand Trelleborg Tires' premium portfolio, combining advanced engineering, application-specific technologies and decades of expertise to support high performance in the field.

Engineered to meet the evolving demands of modern farming, both solutions deliver long-lasting value by helping agricultural professionals maximize productivity throughout the season.

- **CR3000: Made for stubble, built to keep moving**

The **CR3000** is Trelleborg's new harvesting tire for **high-power combines**, designed to perform in the most **challenging harvesting environments**. Featuring advanced technologies engineered to **resist crop residue damage**, it enhances durability and sustains high performance under demanding field conditions.
With **Off-Stubble Technology**, the CR3000 combines an optimized tire structure and dedicated compound to help protect against stubble-related damage. Its innovative interlug design enhances self-cleaning capabilities and helps maintain traction in varying soil conditions, supporting efficient field operations. Integrated **VF-CFO (Very High Flexion - Cyclic Field**

Operation) Technology reduces soil compaction while supporting higher cyclic loads during field operations.
Combining **advanced stubble protection**, **high load capacity** and **extended tire life**, the CR3000 is engineered to maximize productivity when every hour of harvest matters.

- **PneuTrac® Aqua: Engineered for uninterrupted irrigation**

The **PneuTrac® Aqua** is Trelleborg's latest innovation for **center pivot irrigation systems**, designed to meet the challenges of one of agriculture's most demanding applications. Operating continuously throughout the irrigation season in **wet field conditions**, irrigation pivots require a tire capable of delivering traction, stability and uninterrupted performance.
Combining **Trelleborg's airless PneuTrac carcass**, **Omega-shaped sidewall** (**CupWheel technology by Galileo Wheel Ltd.)* and proven **ProgressiveTraction® tread design,** the PneuTrac® Aqua has been engineered specifically for demanding irrigation operations. Its puncture-proof, airless construction eliminates tire maintenance and replacement, helping prevent operational interruptions throughout irrigation cycles, while the Omega-shaped sidewall combines flexibility and lateral stability. The advanced tread design supports traction performance in water-saturated soils, while the PneuTrac carcass delivers a wide, uniform footprint for consistent ground contact and minimized soil compaction.
Designed for **maintenance-free operation**, the PneuTrac® Aqua ensures uninterrupted irrigation performance throughout the season.

"Innovation is most valuable when it responds to real agricultural needs," said Luca Sabelli, Global Marketing Director Trelleborg Tires. *"CR3000 and PneuTrac® Aqua are developed for two highly specialized applications, bringing together advanced engineering and decades of expertise for unmatched productivity. At EIMA 2026, we are proud to showcase these latest innovations and demonstrate how Trelleborg Tires continues to drive the future of agricultural productivity through premium tire technology."*

Trelleborg Tires is a leading global brand delivering advanced solutions for professionals in Agriculture, Material Handling and Construction. Trelleborg anticipates customer needs with a wide range of high-performing tires and complete wheels for off-highway vehicles, engineered for high traction, extended tire life and maximum productivity in every operation.
